WARRANTY STATEMENT:

The manufacturer warrants that this product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with the directions under normal conditions of use. Crop injury, ineffectiveness or other unintended consequences result because of factors as follows: 1. Condition of use: Excessive or improper use, such as application, all of which are beyond the control of the manufacturer. In no event shall the manufacturer be liable for consequential, special or indirect damages resulting from the use of any of our products. 2. Application: Improper mixing with other chemicals, particularly herbicides, insecticides, fungicides and pesticides, may result in crop injury or death. 3. Storage: Improper storage may result in crop injury or death. 4. Application site: The product should not be applied near water, storm drains or drainage ditches or to any impervious surface. The product may be applied to any site if the application site is not a restricted site.

GENERAL INFORMATION: Consistent use of TOGGLE® supplements a well-balanced crop nutrition program. Use TOGGLE® to:

- Maximize crop potential during periods of stress
Improve drought tolerance and resistance to extreme temperatures (cold and heat)
Increase and maximize yield
Optimize nutrient uptake
Improve root growth and development
Improve photosynthesis

To achieve the desired results, the levels of major and minor nutrients must be adequate to support the increase in production. The following rates and timings of application are recommended for optimum efficacy.

COMPATIBILITY: TOGGLE® is compatible with most insecticides, fungicides and fertilizers. When mixing with calcium products, thoroughly mix TOGGLE® with the water in the tank prior to adding the calcium product. If interaction of chemicals is unknown, a jar compatibility test is suggested.

DIRECTIONS FOR USE

TOGGLE® fully dissolves in water and can be used in liquid foliar, soil applied, and water applications. With the proper fertilizer program to improve the crop's use of nutrients and maximize crop potential during periods of stress, TOGGLE® can be tank mixed with commonly used insecticides, fungicides and herbicides. The product must not be applied near water, storm drains or drainage ditches or to any impervious surface. The product may be applied to any site if the application site is not a restricted site.

SAMPLE ONLY

Table with multiple empty rows and columns, likely a data entry form.

Additional applications are recommended prior to major stress events or after severe hail or insect damage or herbicide damage.

Key timings for best results. For more information see your TOGGLE® authorized distributor or TOGGLE® representative.
